

Purchase of steel separators and curtains for catalyst change operations at the low-sulfur diesel production complex, May 2025

Tender No.:172/2025/BTB (Q79436 (88))

Controlling Authority Reference Number:Q79436 (88)

Tender Description

Providing heat-resistant steel spacers and curtains that are corrosion-resistant under the added chemical treatments at Bapco's ultra-low-sulfur diesel production complex. These materials are used to insulate a section of piping or a specific device within the unit for the purpose of careful inspection, cleaning, and general maintenance. These materials are used as semi-permanent or long-term insulation devices due to their high safety. They must be composed of special heat-resistant metals with high melting points and be resistant to deformation and softening at elevated temperatures.
