**Brief description of the project and tender:** Seeds for Resilience is a project of the Crop Trust working with partners to upgrade the physical infrastructure of their genebanks. The project is supported by the Federal Republic of Germany through KfW. This contract is for procurement, installation and construction works for the national seedbank in Zambia. It involves providing all plant, labour, equipment and materials and performing all operations in connection with specified civil, electrical and mechanical works for genebank structures at Mt. Makulu Research Station, Zambia Agriculture Research Institute, and is to be completed within a period of 6 months.

**Please be advised that the Crop Trust is not bound to accept any proposal, nor award a contract or purchase order, nor be responsible for any costs associated with bidder’s preparation and submission of a proposal, regardless of the outcome or the manner of conducting the selection process.**

**Late bids will be rejected.**
