

Interactive purchasing system LED screens (DPS LED Screen solutions)

Title : Interactive purchasing system LED screens (DPS LED Screen solutions)

Reference : U23036

Description : Isavia ohf. together with its subsidiaries is seeking parties to participate in an interactive purchasing system for the purchase of LED display solutions. An interactive purchasing system is a specific arrangement where bids for LED display solutions are requested electronically on the basis of these tender terms and conditions and the requirements set out in the respective closed tender.

The arrangement is effective in the sense that while the interactive purchasing system is in force, it is open to all companies that meet the conditions for participation and have submitted data electronically through the buyer's tender website, in accordance with the terms of the tender documents and instructions on the tender website

.

All purchases within the interactive purchasing system are made through closed tenders through the buyer's tender website.
