

# SANTA FE - WATER - DISTRIBUTION OF DRINKING WATER IN THE LA GUARDIA NEIGHBORHOOD.

## Public Tender No. 1552 - Santa Fe

### Object

The project's objective is to improve the quality of the drinking water distribution service in the "La Guardia" neighborhood, located next to National Route 168 and the junction with Provincial Route 1, in the eastern part of Santa Fe. This project will benefit approximately 1,500 residents.

The project consists of:

The rehabilitation of the existing elevated tank and installation of a cistern within the ASSA property, located on De Petre Street and the intersection with National Route No. 168.

To supply water to the cistern, a connection to the existing DN 110 [mm] PVC pipe that runs to the property is planned. A pumping system consisting of two centrifugal electric pumps operating in a 1+1 mode (one operating unit and one backup unit) will pump the water to the existing elevated tank.

The repair of the switchboard room, warehouse, and chlorination room, as well as the refurbishment of the ASSA site where the work will be carried out, as well as the construction of the pump room.

This also includes the installation of the electrical control panel and the necessary electrical, automation, and basic remote management tasks for the automatic operation of the pumps to be installed, with reporting and activation from the central control unit at the Santa Fe Plant, as well as additional minor installations.

The Contracting System is by Unit of Measurement.
