DEKOKAHA AND DOWNWAY IRRIGATED PERIMETER**

1. The Government of the Republic of Côte d'Ivoire has received financing from the OPEC Fund for International Development (OFID), hereinafter referred to as the Bank, to finance the Agro-Industrial Pole Project in the North (2PAI-NORD), and intends to use part of this loan to make payments under the Contract for the rehabilitation works of the DEKOKAHA hydro-agricultural dam and the downstream irrigated area. For this Contract, the Borrower will make payments using the Direct Payment disbursement method, as defined in the Bank's Guidelines for Disbursements under Investment Project Financing.
2. The Agro-Industrial Pole Project in the North (2PAI-NORD), acting on behalf of the Ministry of State, Ministry of Agriculture, Rural Development and Food Production, is requesting closed offers from eligible bidders who meet the required qualifications to carry out the rehabilitation works of the DEKOKAHA hydro-agricultural dam and the downstream irrigated area, consisting of one (1) single lot consisting of the works described below:

Part 1: Rehabilitation of the Dékokaha hydro-agricultural dam

- The restoration of the retention dam;
- The rehabilitation of the intake structures;
- The creation of a dissipation basin;
- The rehabilitation of two (2) flood spillways, consisting of one (1) flood spillway primary and one (1) secondary flood spillway;
- The creation of pastoral developments;
- The implementation of land stabilization development upstream of the body of water;
- The implementation of environmental and social measures.

Section 2: Development of the irrigated area downstream of the dam:

The irrigated area is a gravity-fed, open-air canal system covering a total area of approximately 220 ha and including the following works:

- Cleaning and reprofiling the main drain; - Construction of the secondary drain; - Construction of guard drains and outlet drains; - Construction of service tracks along the primary and secondary channels;
- The construction of hydraulic works;
- The implementation of land stabilization development upstream of the body of water;
- The implementation of environmental and social measures.

Section 3: Support infrastructure:

- The construction of a 200 m2 storage warehouse in each beneficiary village (4 stores);
- The construction of a latrine block with 4 cabins and a hand-washing facility for each beneficiary village (4 sets).
- The construction of a composting bin per village.

The works are made up of one (1) single lot for a maximum execution period of fifteen (15) months excluding wintering as indicated in the following table:

Lot	Shutters	Designation	Lead time (months)	
Unique	1	Rehabilitation of the hydro-agricultural dam	5	Fifteen (15) out wintering
	2	Development of the irrigated area downstream of the dam	15	
	3	Support infrastructure		

The market will be at unit prices.

The qualification requirements are: average annual turnover - specific experience - personnel - equipment (See the Special Data of the Call for Tenders (DPAO) for detailed information).
