1 Agreement Overview

This Agreement represents a Service Level Agreement (“SLA” or “Agreement”) between the buyer and Service Provider for Cleaning, Sanitation and Disinfection Service. The purpose of this agreement is to facilitate implementation of Cleaning, Sanitation and Disinfection Serviceat the buyer's premises or any other premises designated by buyer.This Agreement outlines the scope of work, buyer's obligations, special terms and conditions related to service delivery and payment of services for mutual understanding of the stakeholders. The Agreement remains valid till completion of scope of services or end of contractual duration (whichever is earlier) unless either superseded by arevised agreement mutually endorsed by the stakeholders or terminated by either of the parties thereof.

The Services contracts placed through GeM shall be governed by following set of Terms and Conditions:

- General terms and conditions for Services;
- Service Specific STC of the Services contracts shall include the service level agreement (SLA) for the service;
- BID / Reverse Auction specific ATC.

The above terms and conditions are in reverse order of precedence i.e. ATC supersedes Service specific STC which supersede GTC, whenever there are any conflicting provisions. The above set of terms and conditions along with scope of work and service level agreement as enumerated in the document shall be construed to be part of the Contract between Buyer and Service Provider.

2 Objectives and Goals

The objective of this agreement is to ensure that all the commitments and obligations are in place to ensure consistent delivery of services to buyer by Service Provider. The goals of this agreement are to:

- Provide clear reference to service ownership, accountability, roles and responsibilities of both parties
- Present a clear, concise and measurable description of services offered to the buyer
- Establish terms and conditions for all the involved stakeholders, it also includes the actions to be taken in case of failure to comply with conditions specified
- To ensure that both the parties understand the consequences in case of termination of services due to any of the stated reasons

The agreement will act as a reference document that both the parties have understood the above-mentioned terms and conditions and have agreed to comply by the same. The agreement can also be revised/ modified on mutual consent of the stakeholders.

3 Parties to the Agreement

The main stakeholders associated with this agreement are below-

- Buyer** : Buyer isresponsible to provide clear instructions, approvals and timely payments for the services availed
- Service Provider**: Service Provider responsible to provide all the required services in timely manner. Service Provider may also include seller, any authorized agents, assignees, successors and nominees as described in the agreement

The responsibilities and obligations of the stakeholders have been outlined in this document. The document also encompasses service level/ penalties in case of non-adherence to the defined terms and conditions. It is assumed that all stakeholders have read and understood the same before signing the document.

4 Scope of Services

The scope of work of Cleaning, Sanitation and Disinfection services comprise of a series of activities, including, but not restricted to sweeping, wet cleaning, steam cleaning and such other activities as may be necessary to maintain acceptable standards of cleanliness within a defined set of premises.

The scope of the service requires the Service Provider to provide manpower and resources for the premises as specified by the Buyer for the purposes of Cleaning, Sanitation and Disinfection. It would be the obligation of the Vendor to provide services according to the following:

There will be 2 types of evaluator for service quality provided by service provider.

1) Users (Employees/Patients/Visitors etc.)

2) Buyer (Nodal Officer/Consignee of buyer organization)

Service provider need to provide electronic/manual feedback system for users to rate the quality of the service for all type of areas taken in to consideration in contract or where ever the Service provider is providing cleaning, sanitation and disinfection service. Similarly, Buyer nodal officer will also give his feedback to the quality of delivered service. User feedback system should be made available to all the users throughout the period of contract.

Calculation of Buyer feedback Score : Feedback Ratings for all type of area under the contract should be added to reach a cumulative score and then same should be divided by cumulative maximum score to get a final buyer feedback score for quality of services. (Refer to Buyer evaluation table) (Rating system - 0 to 4)

Calculation of User feedback Score : User will provide feed back on the quality of service on parameters of excellent, Ok and Poor. The no. of these feedbacks on each parameter will

be counted to get a cumulative no. of feedback received. The no. of counts of each parameter will be multiplied by weightage defined in above table to get the score for each parameter. The overall cumulative score should be divide by total no. of feedback received to get the final user feedback score for the service. (Refer to Buyer evaluation table) (Rating system - Excellent, Ok and Poor)

Now to get the overall final score for the service for a particular billing cycle, the final buyer feedback score X 20% = A and final user feedback score X 80% = B

Final Score = A+B

Disinfection Service- Scope and Guidelines

Over and above the Service Level Agreement (SLA) which is applicable for Cleaning & Sanitation Service , the following Guidelines issued by National Centre for Disease Control (NCDC) and Ministry of Health and Family Welfare (MoH&FW) will also constitute the SLA for Disinfection Service :

a) NCDC Guidelines:

Scope: This document aims to provide interim guidance about the environmental cleaning / decontamination in quarantine camp facilities (e.g. barracks, cubicles in rooms, offices, and toilets, etc.) where persons with potential exposure to COVID-19 have housed.

The causative agent involved in the current outbreaks of 2019-nCoV acute respiratory disease, the 2019-nCoV (genus: Betacoronavirus), belongs to the family of Coronaviridae, a large family of enveloped, positive-sense single-stranded RNA viruses. Coronaviruses are transmitted in most instances through large respiratory droplets and contact transmission, but other modes of transmission have also been proposed worldwide.

The time of survival and the conditions affecting the 2019-nCoV viability in the environment are currently unknown. According to studies assessing the environmental stability of other coronaviruses, the Severe Acute Respiratory Syndrome coronavirus (SARS-CoV) is estimated to survive several days in the environment and the Middle East Respiratory Syndrome-related coronavirus (MERS-CoV) more than 48 hours at an average room temperature (20°C) on different surfaces [1-3].

Environmental cleaning: Due to the potential survival of the virus in the environment for several days, the premises and areas potentially contaminated with the 2019-nCoV should be cleaned before their re-use, using products containing antimicrobial agents known to be effective against coronaviruses. Although there is lack of specific evidence for their effectiveness against 2019-nCoV virus, cleaning with water and household detergents and use of common disinfectant products should be sufficient for general precautionary cleaning. Tests carried out using SARS-CoV showed that sodium hypochlorite is effective.

These guidelines provide guidance for environmental cleaning in quarantine facilities housing people exposed/ potential exposure to COVID-19 and have been adapted based on the Hospital Infection Prevention and Control guidelines drafted by NCDC in collaboration with WHO and other stakeholders.

Nano tech/Laser cleaning/Antimicrobial Coating Service – SLA and Guidelines

Over and above the Service Level Agreement (SLA) which is applicable for Cleaning & Sanitation Service, if the buyer selects Nano tech/Laser cleaning/Antimicrobial Coating Service as nature of service, the following will also constitute the SLA for buyers and service providers:

- Microbial Assessment of all high touch surfaces before service using ATP Detection Method or TVC Culture Test to know the current level of risk.
- Disinfection of the whole of indoor areas of the facility using government approved chemical through ULV Fogging method to kill all microbes from every hard and soft surfaces.
- Electrostatic Application of Organosilane Antimicrobial to protect the whole of indoor areas of the facility for a minimum period of 30 days. The antimicrobial protection to be

applied on every hard and soft surface.

- Microbial assessment of all high touch surfaces post service on the same day using ATP detection method or TVC culture test.
- Periodic microbial assessment every 15 days of all high touch surfaces post service on the same day using ATP detection method or TVC culture test to analyze the efficacy of antimicrobial treatment and planning for re-treatment cycle.

Scope and Guidelines for HealthcareSpace

Over and above the Service Level Agreement (SLA) which is applicable for Cleaning & Sanitation Service,if the buyer selects Healthcare as type of space,the guideline as mentioned in the NationalGuidelines for Clean Hospitals 2015 will alsoconstitute the SLA for buyer and service providers.
