Generic	Description	Decorative Laminates are synthesised from paper and plastic resins, these are composite material consisting of two or more layers bonded together to achieve improved strength, stability, and appearance. These either consist of layers of paper or fabric impregnated with resin and covered by a protective overlay. Decorative Laminates come in various colours, patterns, and textures, making them popular for surfacing countertops, cabinets, furniture, and flooring due to their affordability and aesthetic appeal, they are versatile and durable materials used in interior design and construction.				
	Decorative Layer	This is the top layer, which features a printed design or pattern. It can mimic the appearance of various materials, such as wood, stone or metal.				
	Bonding Material of Decorative Layer	Amino plastic Resin				
	Core Layers	Below the decorative layer, there are several layers of kraft paper that are impregnated with phenolic resin. These layers provide strength and stability to the laminate.				
	Backer Layer	The bottom layer is also made of resin-impregnated kraft paper and serves as a protective backing.
